Abstract: **Selecting** analysis software can be a daunting task. Over the years, analysis tools have evolved from..

... a compelling requirement for a fiercely competitive environment with a reduced product development cycle time. **Current** solvers are complex algorithms that often require extensive research time to comprehend and consume precious...

with a **current** browser can be used to share files in this way. Online collaboration services also provide...

...otherwise be accessed through separate applications or several Web sites. It is necessary to balance **specific** factors when deciding to put company data into the hands of an external service, however. Users typically sign up for the service by **selecting** a name that becomes part of their address. Then employees go to that address and **log on** with individual passwords and **user names**. With Office Live from Microsoft Corp., however, each employee associated with a company visits officelive...

...at a desktop machine, but there are some differences. Everything takes more time because every **change** requires a page to be downloaded to the user's browser, uploaded to the server...
